1 Introduction

The following is a bibliography of UK reports, journal articles, case studies and unpublished PhD theses focussed on fuel poverty and attendant issues, published primarily within the last 10 years. Several Ireland based studies are also included.

The references were gathered during 2014 -2016, and the bibliography updated and completed during October 2016.

This bibliography cannot be comprehensive. However a range of sources were used to identify journal articles and grey literature including major health and/or social sciences focussed bibliographic databases with further browsing of bibliographies. Bibliographic databases of specific relevance to the study of the built environment were not searched.

Databases used to identify studies included:

- ASSIA
- Embase
- British Library EthOS
- International Bibliography of the Social Sciences
- Medline
- Proquest Public Health
- Social Services Abstracts
- Web of Science.

Much of the grey literature was identified via searches of Google Advanced.
